

Perdocere Math Tutoring

Perdocere (Latin, present active infinitive) "To Teach or Instruct Thoroughly"

Perdocere is a true one-person premier educational company and is proud yet again to be awarded the First Place Blue Ribbon for providing by far the best private instruction in Wellesley, Westwood, Dover, Sherborn, Medfield, Needham, and Walpole. This recognition, among many others, belongs to all of my students over the decades. It's about the intellectual journeys we have taken together, your love for learning, your hard work and perseverance, and your achievement of educational excellence. Congratulations to each and every one of you, approbation with distinction and well done!

The most important validation is what students and parents have to say, so please visit www.perdocere.com and read the continuously growing list of hundreds of testimonials.

"When George takes on a student, for him it is not just a job, for him it is a commitment which he honors spectacularly. A commitment to help you do well in school and also a commitment to actually learn the subject matter." (Math: 800 SAT, 36 ACT)

"In preparation for high school, I asked George to find and patch the holes that we knew existed in my daughter's math knowledge. Although my daughter has been an A student in math, it was apparent to me that she was getting by without really understanding the logic and meaning behind what she was doing in math. Because of this mechanical, memorization based approach to math, she found the subject to be her least favorite. George promised that he would find the holes in her knowledge and would then equip her with a deeper, more functional way of attacking math problems. In only a few sessions, the change in my daughter was evident. Her test grades improved, but most importantly, so did her confidence and creativity in finding solutions to math problems. My daughter happily sits through her sessions with George and is 100% engaged and happy. George is brilliant, thoughtful and kind and really understands how to work with kids. I feel that George is fully invested in my daughter's success. I wish that all teachers were as wonderful and George!"

"800 - we thought that sort of score was something unattainable - something that only a few gifted students achieved. And now our son (who we love dearly but never considered to be a particularly gifted math student) has brought home 800's twice - once on the SAT and once on the SAT IIC. We attribute so much of this achievement to George. He restructured fundamentals and taught our son to enjoy math once again. George consistently challenged and pushed - but never too much. He displayed patience and a wonderful gift for explaining things. As our son told us, George not only works through problems but teaches how everything evolved and why everything is what it is. We couldn't ask for a better teacher. We really don't have enough adjectives to describe George's teaching ability. He is absolutely the best teacher that we have ever seen!!! George - your job with number one son is almost done - it is now time to move to number two."

"George re-defines the definition of tutor. We have never met anyone with his credentials, mastery of the subject and infinite sense of caring and can-do attitude. The stress level as it relates to school work has gone way down in our home since he began tutoring our daughter. We only wish we had met him years sooner."
